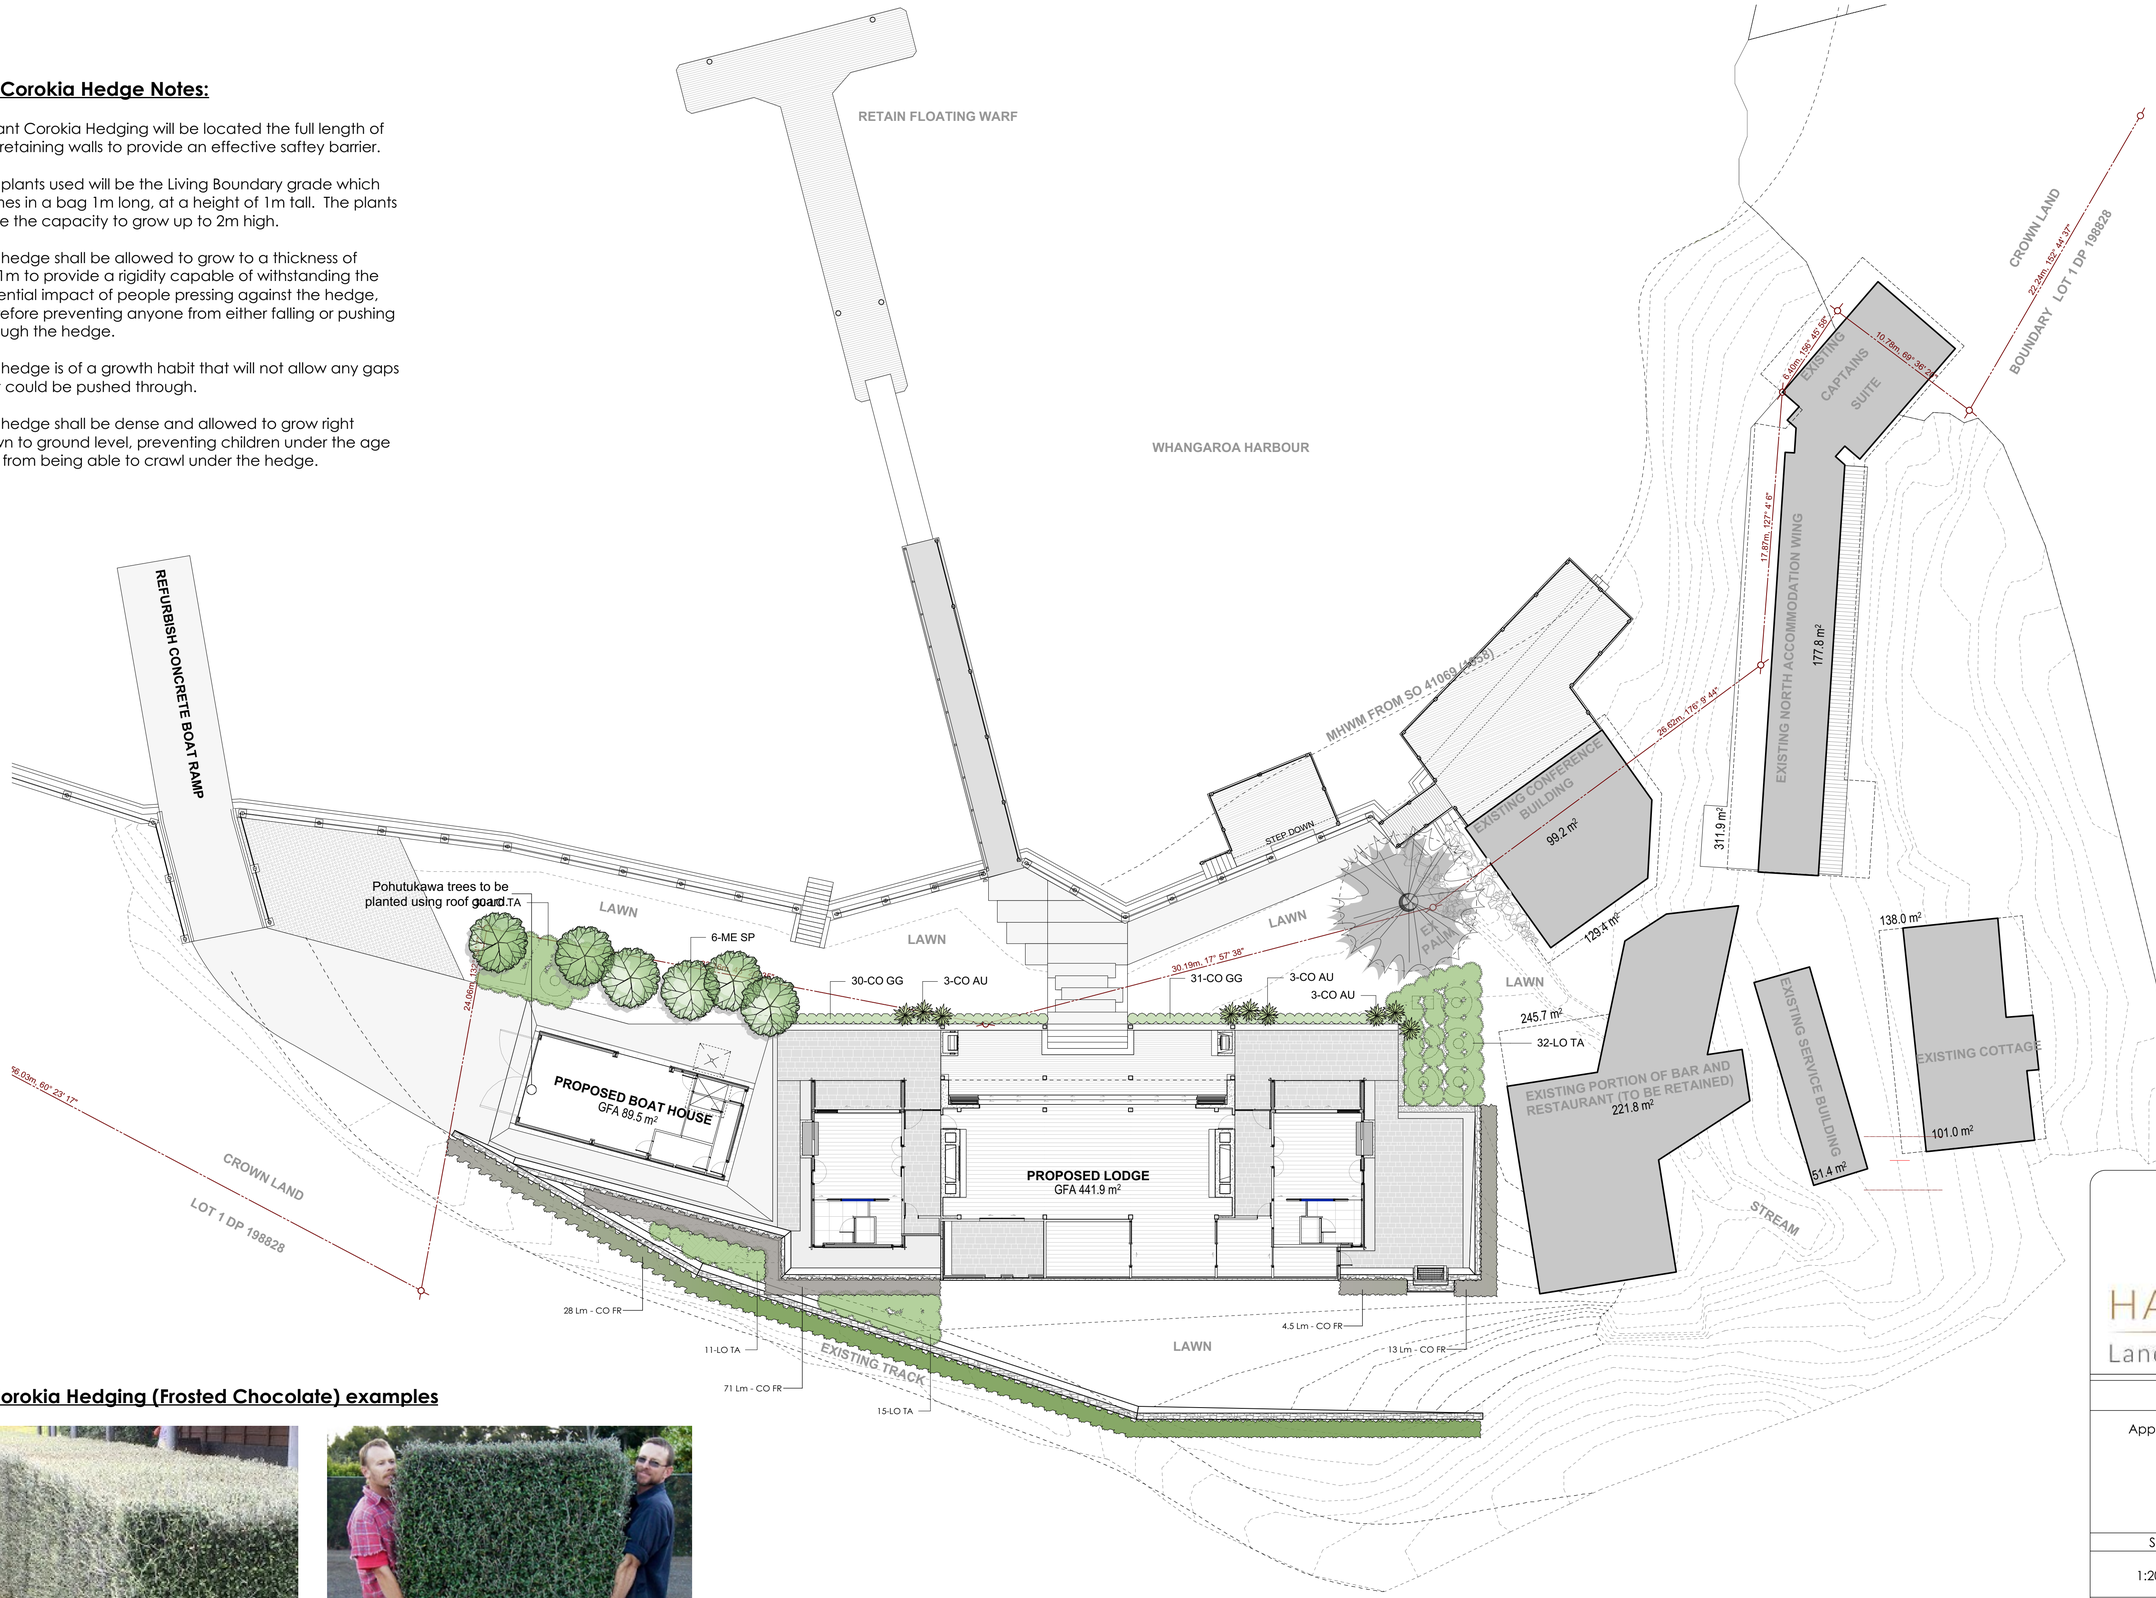
Instant Corokia Hedge Notes:

- Instant Corokia Hedging will be located the full length of the retaining walls to provide an effective saftey barrier.
- The plants used will be the Living Boundary grade which comes in a bag 1m long, at a height of 1m tall. The plants have the capacity to grow up to 2m high.
- The hedge shall be allowed to grow to a thickness of 0.7-1m to provide a rigidity capable of withstanding the potential impact of people pressing against the hedge, therefore preventing anyone from either falling or pushing through the hedge.
- The hedge is of a growth habit that will not allow any gaps that could be pushed through.
- The hedge shall be dense and allowed to grow right down to ground level, preventing children under the age of 6 from being able to crawl under the hedge.



Instant Corokia Hedging (Frosted Chocolate) examples

Example of hedge tickness and density.

Example of Corokia Frosted Chocolate hedge in Twinnings Valley Living Boundary grade bag.
