

Density

- High Density- Indicated by 5 or more calls per hour
- Present- Indicated by less than 5 calls per hour

This map represents the distribution of Northland brown as at January 2020. The distribution is a collation of field observations, active recovery projects and professional experience. The distribution is the best judgement possible given the evidence available. Absence of kiwi populations as indicated in this map means that there is no robust anecdotal or survey evidence of populations in these other areas. For further detail please contact:
