

# Catchpool Valley Activity Cards

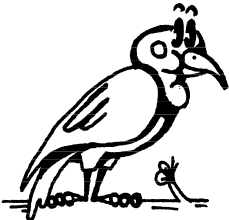

# Catchpool Valley activity cards

## To the supervisor

As you lead your group on an exploration of Rimutaka Forest Park, please ensure that the group stays together, treats the environment respectfully and takes the opportunity to absorb as much information as possible whilst enjoying these bush walks. These activity cards will help students to focus on the particular themes that link to pre-visit and post-visit studies at school.

The map on the reverse of this card identifies suitable sites to use each card but you may prefer to use them in other areas that you find appropriate.

- Nga Taonga Track (just north of the Visitor Centre) is a 20-minute interpreted walk that will introduce you to some of the local plant species found in the Rimutaka Forest Park.
- Read the panel 'Stages of Regeneration' at the beginning of the track.
- On the Catchpool Loop Track (a 45-minute return walk), compare tree ferns and podocarps.
- The 5 Mile Loop Track (a 2-hour return walk) has panels about 'Beech forests.'

TAKE ONLY INFORMATION – LEAVE ONLY FOOTPRINTS – REMOVE ONLY RUBBISH
