Tēnā koe [Redacted]

Thank you for your request to the Department of Conservation, received on 29 August 2023, in which you asked for:

*The most up to date version of the Bay of Islands kiwi distribution map – support document (2018).*

This is the most recent version of the document. As you will note – the document outlines kiwi distribution mapping will be updated every 5 years – based on kiwi call count data.

The maps have not been updated since the 2018 maps were created – and therefore are the most recent data held.

Please note the maps are publicly available and can be found via Far North Maps – Species Distribution (DoC) - <https://www.fndc.govt.nz/Our-services/Far-North-Maps>

We have not considered your request under the Official Information Act 1982, as the information is already publicly available.

Nāku noa, nā
