Key Documents

Richard, Y; Abraham, E R; Filippi, D (2011). Assessment of the risk to seabird populations from New Zealand commercial fisheries. Final Research Report prepared for the Ministry of Fisheries (project IPA2009/19, Objective 1 Milestone 4; project IPA2009/20, Objective 1, Milestone 4). Held by the Ministry for Primary Industries.

Black petrel

Bell, E A; Sim, J L; Scofield, P; Francis, C; Landers, T (in press). At-sea distribution and population parameters of the black petrels (Procellaria parkinsoni) on Great Barrier Island (Aotea Island), 2012/13. DRAFT report for project POP2012-03. Department of Conservation, Wellington. 92 p.

Imber, M J; McFadden, I; Bell, E A; Scofield, R P (2003). Post-fledging migration, age of first return and recruitment, and results of inter-colony translocation of black petrels (Procellaria parkinsoni). Notornis 50(4): 183-190.

Salvin’s albatross

ACAP species assessment. Salvin’s albatross EN1.1.

Sagar, P M; Charteris, M R; Carroll, J W A; Scofield, R P (2011). Population size, breeding frequency and survival of Salvin’s albatrosses (Thalassarche salvini) at the Western Chain, The Snares, New Zealand. Notornis 58: 57-63
Flesh-footed shearwater

Rayner, M J; Taylor, G A; Thompson, D R; Torres, L G; Sagar, P M; Shaffer, S A (2011). Migration and diving activity in three non-breeding flesh-footed shearwaters Puffinus carneipes. Journal of Avian Biology 42: 266-270

Thalmann, S J; Lea, M-A; Hindell, M; Priddel, D; Carlile, N (2010). Provisioning in flesh-footed shearwaters (Puffinus carneipes): plastic foraging behavior and the implications for increased fishery interactions. Auk 127: 140-150.

Southern Buller’s albatross

Francis RICC; Sagar PM; Fu D (2008). Status of the Snares Islands population of southern Buller’s albatross. Final Research Report for Year 2 of Ministry of Fisheries Research Project PRO200602. 138 p. (Held by the Ministry for Primary Industries).

Sagar, P M; Stahl, J C (2005). Increases in the numbers of breeding pairs in two populations of Buller’s albatross (Thalassarche bulleri bulleri). Emu 105: 49-55.

Sagar, P; Torres, L; Thompson, D (2013). Long-term research into Buller’s Albatrosses at The Snares – 65 years, but no sign of a gold card. Presentation for CSP-TWG 31-7-2013. Department of Conservation, Wellington. 35 p.

Sagar, P; Torres, L; Thompson, D (2012). Demography and distribution of Buller’s Albatrosses Thalassarche bulleri bulleri: Final research report of the 2012 field season. Department of Conservation, Wellington. 19 p.

Sagar, P; Torres, L; Thompson, D (2010). Demography and distribution of Buller’s Albatrosses Thalassarche bulleri bulleri: Final research report of the 2012 field season. Department of Conservation, Wellington. 16 p.

Chatham Island albatross

ACAP species assessment. Chatham Island albatross EN1.1.

New Zealand white-capped albatross

ACAP species assessment. New Zealand white-capped albatross EN1.1.

Baker, B G; Double, M C; Gales, R; Tuck, G N; Abbott, C L; Ryan, P G; Petersen, S L; Robertson, C J R; Alderman, R (2007). A global assessment of the impact of fisheries-related mortality on shy and white-capped albatrosses: Conservation implications. Biological Conservation 137: 319–333.

Double, M C; Gales, R; Reid, T; Brothers, N; Abbott, C L (2003). Morphometric comparison of Australian shy and New Zealand white-capped albatrosses. Emu 103: 287-294.

Torres, L G; Thompson, D R; Bearhop, S; Votier, S; Taylor, G A; Sagar, P M; Robertson, B C (2011). White-capped albatrosses alter fine-scale foraging behaviour patterns when associated with fishing vessels. Marine Ecology Progress Series 428: 289-301.
Northern Buller’s albatross

Fraser, M; Cameron, N; Scofield, P; Robertson, C J R (2010). Population assessment of Northern Buller’s Albatross and Northern Giant Petrels at the Forty-Fours, Chatham Islands, 1 – 8 December 2009. Final Research Report for project PRO2006-01D. 11p. (Held by the Ministry for Primary Industries).

Sagar, P; Torres, L; Thompson, D (2013). Long-term research into Buller’s Albatrosses at The Snares – 65 years, but no sign of a gold card. Presentation for CSP-TWG 31-7-2013. Department of Conservation, Wellington. 35 p.
Gibson’s albatross

Cape petrel

**Antipodean albatross**

Miskelly, C M; McNally N; Seymour R; Gregory-Hunt D; Lanauze J (2008). Antipodean wandering albatrosses (Diomedea antipodensis) colonising the Chatham Islands. Notornis 55: 89-95.

Northern royal albatross

Richard, Y; Perriman, L; Lalas, C; Abraham, E R (2013). Demographic rates of northern royal albatross at Taiaroa Head, New Zealand. 24 pages. (Unpublished report held by the Department of Conservation, Wellington.)

Westland petrel

Northern giant petrel

**White-chinned petrel**

Martin, A R; Poncet, S; Barbraud, C; Foster, E; Fretwell, P; Rothery, P (2009). The white-chinned petrel (Procellaria aequinoctialis) on South Georgia: population size, distribution and global significance. Polar Biology 32: 655-661.

Spotted shag

Campbell Island albatross

Yellow-eyed penguin

Grey petrel

Little black shag

**Pied shag**

Stewart Island shag

New Zealand king shag
