

# Hakaterere Conservation Park

MID CANTERBURY

*Arawai Kākāriki*  
wetland restoration programme  
Ō Tū Wharekai

## Ō Tū Wharekai wetland restoration project

Hakaterere Conservation Park is part of one of the best wetlands in the country. A national wetland restoration project was started in 1997 and involves three premier sites: Whangamarino in Waikato, Awarua/Waituna in Southland and Ō Tū Wharekai here in Canterbury.

The rivers, lakes, tarns and swamps of Ō Tū Wharekai have their own special range of species; some of which are rare, for example our kettle holes are home to 23 threatened plants. Although each wetland habitat is unique, all waterways are interconnected, breathing life into the Hakaterere basin.

## Hakatere Conservation Park

*Shaped by the past, conserved for the future.*

### Takata whenua—the first people of the land

Te Kopi o Hakatere/Ashburton Gorge was the main pounamu/greenstone trail for the Arowhenua hapū—Kāti Huirapa.

The trail connects the upper reaches of the Rakaia to Noti Raureka/Browning Pass and then heads down to Te Tai Poutini/the West Coast.

Travellers gathered food as they made their way from one coast to the other. The name Ō Tū Wharekai, given to the Ashburton lakes and upper Rangitata River area, is not a literal translation, that is, ‘the place of a food storehouse’, but is a poetic description of the area as a well-stocked natural food basket on the journey to the Arahura, the pounamu capital of the Māori world.

### European history

In this area pastoral farming, particularly merino sheep farming, was the dominant activity in early days of European settlement. Within the park, there is evidence of this in the historic hut at Lake Emma, the Hakatere Station buildings, musterers' huts and pack tracks.

Native vegetation, regarded as an obstruction to travel and grazing, was often cleared by burning. L Kennaway, an early run holder, described setting fire to the hill country to get

*Photo: Chaffey family collection*

his stock through: “. . . a hot, roaring belt of fire blazed up the hill-side, hissing and crackling and . . . absolutely screaming human screams, as the thick untouched jungle of scores of years withered and twisted in the flames.”

The arrival of the railway to Mount Somers in 1889 made the region more accessible, sheep transportation much easier and the mining of minerals more economically viable. It led to the development of service-centre townships at Methven and Mount Somers.

### Hakatere corner

The buildings at Hakatere corner are a good place to start your exploration of this dramatic area. They include one of mid-Canterbury's oldest dwellings, the ‘Stone Cottage’, which was constructed in 1862 to accommodate the manager of Hakatere Station. While you are there, call in to the interpretation room, which is housed in the shearers' quarters, and discover more about the history of the area and the buildings themselves.

*Hakatere corner farm buildings*

*Photo: Gilbert Donaldson*

## Native plants you might see

Fescue tussock and snow tussock grasslands are common, with remnants of largely mountain beech/tawhairauriki forest along the eastern foothills. Second-growth forest is also present in pockets along the foothills. Species include broadleaf/kāpuka, Hall's tōtara, tree fuchsia/kōtukutuku, marble leaf/putaputāweta, kōhūhū and pōkākā, with the understorey dominated by crown fern and bush lawyer. Southern rātā, a botanical rarity in this part of Canterbury, is also found in places.

Threatened plants in the area include a tiny forget-me-not (*Myosotis brevis*), a sedge (*Carex tenuiculmis*) and one of the largest known populations of a native lily, *Iphigenia novae-zelandiae*, in New Zealand.

Wetlands in the park include some of the best examples of red tussock (*Chionochloa rubra*) and *Carex secta*/pūkio in Canterbury.

An extensive network of kettle hole wetlands, with associated turf vegetation, occurs among moraines and is a rare habitat type nationally. Many threatened turf-

*Bulbinella hookeri*

Bladderwort

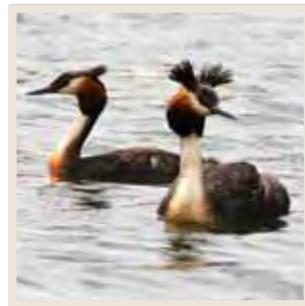

Gentians in a kettle hole

forming plants are found here, including pygmy clubrush (*Isolepis basilaris*), dwarf woodrush (*Luzula celata*) and a water brome or semi-aquatic grass (*Amphibromus fluitans*).

## ... and native animals

The rivers, lakes and wetlands provide nationally important habitats for many bird species including the endangered wrybill/ngutu pare, black-fronted tern/tarapirohe, Australasian crested grebe/kāmana, Australasian bittern/matuku and marsh crane/koitareke.

Lizards/ngārara are also found, including the scree skink/mokomoko, one of New Zealand's largest lizards. There is a spectacular and distinct wētā, Mount Somers giant wētā, a *Deinacrida* species, as well as native fish and a diverse range of aquatic and terrestrial invertebrates.

Australasian crested grebe/kāmana  
Photo: © Peter Langlands

Scree skink

## The lakes and boating

Because of high wildlife values, boating on most of the lakes is restricted to paddle-propelled craft only. However, on Lake Camp (Ōtautari), motor, wind and paddle-propelled boats are permitted, while on Lake Clearwater (Te Puna a Taka), motor boats are not permitted.

For all boating regulations, refer to:  
[ecan.govt.nz](http://ecan.govt.nz) and search for Bylaws

Hunting at Mt Potts, *Photo: G Iles*

## Hunting

Recreational hunting is allowed on public conservation land in and around Hakatere Conservation Park. A DOC hunting permit must be carried at all times. Red deer are present throughout the area, and there may be chamois and tahr and the occasional pig. Information on hunting on public conservation land and hunting permits are available through [www.doc.govt.nz/canterbury-hunting](http://www.doc.govt.nz/canterbury-hunting).

## Dogs

Dogs are permitted in most of Hakatere Conservation Park; however, they are not permitted around the shores of Lake Heron (Ō Tū Roto), Lake Clearwater (Te Puna a Taka) and Maori Lakes (Ō Tū Wharekai). Please be responsible for your dog—do not let them roam, disturb other users or enter huts or other buildings.

## Te Araroa

Te Araroa, a walking trail from Cape Reinga to Bluff, passes through the park. (See [www.teararoa.org.nz](http://www.teararoa.org.nz) for more information.)

## Safety is your responsibility

Follow these five simple rules to help you plan and prepare before engaging in outdoor activities:

Plan your trip

Tell someone

Be aware of the weather

Know your limits

Take sufficient supplies

Visit [www.adventuresmart.org.nz](http://www.adventuresmart.org.nz) to learn more and to log your outdoor intentions with your trusted contact

## Track grades

Choose the type of track that matches your skills, fitness and the experience you want—be realistic.

### Walking track

Gentle walking from a few minutes to a day.

Track is mostly well formed. Some sections may be steep, rough or muddy.

Suitable for people with low to moderate fitness and abilities.

Clearly signposted. Stream and river crossings are bridged.

Walking shoes or light tramping/hiking boots are required.

### Tramping track

Challenging day or multi-day tramping/hiking.

Track is mostly unformed with steep, rough or muddy sections.

Suitable for people with good fitness. Moderate to high level of back country skills and experience, including navigation and survival skills, required.

Track has markers, poles or rock cairns.

Expect unbridged stream and river crossings.

Tramping/hiking boots required.

## Route

Challenging day or multi-day tramping/hiking. Track unformed and natural, rough, muddy or very steep.

Suitable for people with above-average fitness. High-level backcountry skills and experience, including navigation and survival skills, required.

Complete self-sufficiency is required.

Track has markers, poles or rock cairns. Expect unbridged stream and river crossings.

Sturdy tramping/hiking boots required.

## Mountain bike tracks

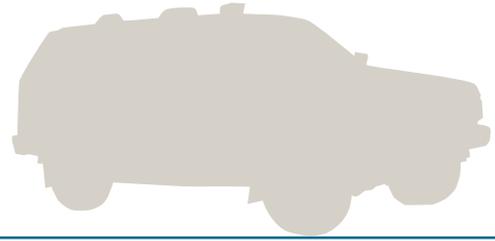

Grade 2: mostly flat with some gentle climbs on smooth track, with easily avoidable obstacles such as rocks and potholes.

### Easements

An easement is a public right of way across private land. Please stay on the marked route.

### *Please remember*

Please remember that mountain biking tracks are being shared with walkers and trampers, and other bikers who may be moving in either direction. It should be ridden in accordance with the 'Mountain Bikers Code':

## 4WD care code

Please follow the code of conduct to protect the environment and for the long-term sustainability of off-road driving.

- Avoid sensitive areas. Alpine landscapes, swamps, waterways, sand dunes and riverbeds are easily damaged by vehicles.
- Abide by the laws and regulations covering all vehicles and drivers.
- Stay on roads. Avoid widening them.
- Keep the environment clean. Take all your rubbish with you.
- Respect wildlife; look but don't disturb and keep your distance.
- Find out if a permit is required for access. If your trip crosses private land obtain permission.
- Leave gates as you find them.
- Always thoroughly clean your vehicle before and after trips to minimise spreading weeds and diseases.
- Respect the right of others for quiet enjoyment. Avoid noisy driving. Give way to walkers, cyclists, horse riders and others.
- Be prepared for the unexpected. Drive at a speed that will allow you to stop if a hazard arises.
- If winching is necessary, wherever possible, use another vehicle. If you must use a tree, use webbing or padding to prevent damaging the tree.
- Cross waterways with care. Use designated crossings wherever possible.

Swin River looking towards Taylor Range

---

## Horse riding care code

---

Ride with care for the environment and others.

### Sharing tracks and trails

When using tracks that are shared with mountain bikers, walkers and 4WD drivers, approach blind corners no faster than a walk, as other users may be just around the corner. Pass others at a walk and keep your horse under control at all times.

### Weeds and disease

- Before entering conservation areas, please make sure all your horse riding gear is cleaned and free of seeds and soil, which may spread weeds and disease. Also thoroughly clean your horse's hooves and your float or truck.
- Only allow your horse to eat weed-free feed at least 48 hours before entering a conservation area. Weed-free feed includes clean chaff, pellets and cracked, rolled or steamed grains. Never take meadow hay as it often contains seed. If you can't

do this, then carry bags, pick up your horse's poo and take it home with you.

- When carrying hard feed, take a nosebag for your horse. It minimises spillage, which adds to the food supply for pests such as mice and rats.
- Consider undertaking some basic education in weed and seed identification, and assisting DOC in identifying and eliminating new outbreaks of problem species.

### Protecting the environment

- Please do not take horses into fragile natural areas that have a high conservation value, such as swamp land, sand dunes or fragile alpine areas. Horses can damage natural ecosystems by trampling and grazing. Be observant and avoid unduly disturbing unstable or erosion-prone soils.
- When crossing waterways, select firm, stony crossings, and cross at a 90° angle to the banks. Use bridges or well-used crossings wherever possible to limit erosion of the banks.
- Carry and use canvas or collapsible buckets and/or pump and hose where possible to water and wash horses.

### Using campsites and huts

- When staying more than one night in the same place, relocate portable yards each night to help minimise trampling and vegetation damage.
- Use tree protectors when putting up nightlines to prevent trees from being damaged. Incorporate stops in the nightlines to prevent horses moving and becoming entangled in trees.
- Where possible, make nightlines at least 15 m long to reduce concentrated impact.
- Always camp horses well clear of watercourses (at least 50 m away). Wash and water horses downstream from where other campers get their water.
- Remove horse manure from hut and campsite areas. Take it home with you or scatter it so that it degrades faster. Take all your rubbish and recycling with you—don't bury or burn it.

---

## Access

---

There are a number of different access points into Hakatere Conservation Park:

### Ashburton Gorge Road

Visit Stour River and Mount Barrosa.

### Hakatere Potts Road

Explore Lake Emma (Kirihonuhonu), Lake Clearwater (Te Puna a Taka), Mount Sunday or Mount Potts.

### Hakatere Heron Road

Discover Buicks Bridge, Maori Lakes (Ō Tū Wharekai), Lake Emily, Lake Heron (Ō Tū Roto) and Cameron River.

### Blackford Road / Double Hill Run Road

Enjoy Mount Hutt Range, Redcliffe Scenic Reserve, Turtons Saddle, Double Hill and the Palmer Range

---

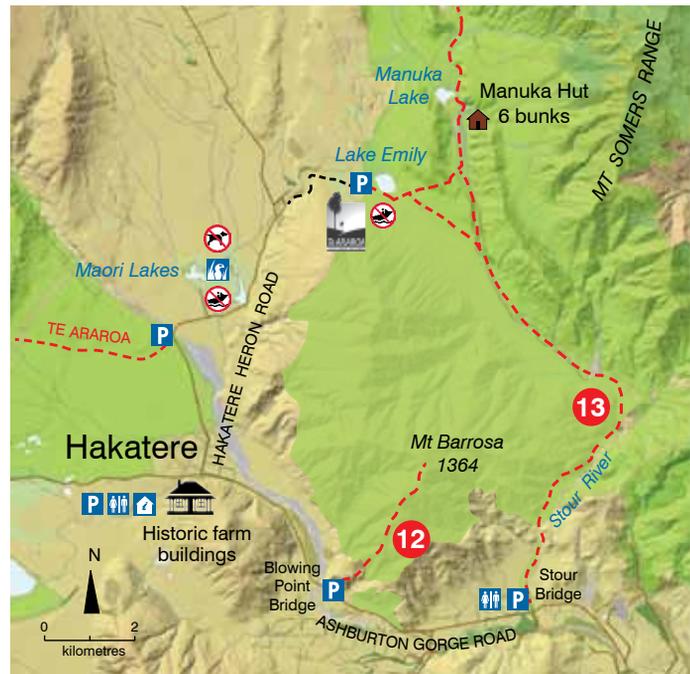

## Ashburton Gorge Road

---

Access along this road has not always been easy; originally it was rutted and poorly made. To get the coal, clay, silica sand and limestone down to the township, a horse-drawn tramway was built in 1901 and was converted to steam in 1907. This branch line ran until 1940, by which time the Ashburton Gorge Road had been improved to a high enough standard for trucks to use. Today, as you travel this same route, it is difficult to visualise the difficulties the early travellers had.

### Stour River

There is easy access to Lake Emily and Manuka Hut from the car park at Stour Bridge. The track follows the Stour River, which is carving its way through rhyolite bedrock, formed during volcanic eruptions. When this molten rock flowed past, it would have been between 700°C and 1200°C. As the lava cooled, it split, making the columns that can be seen along the valley sides. The rhyolite makes a rich soil, which supports a wide range of plants. You will see bright green patches of broadleaf/kāpuka, while the dull green, deciduous trees are mountain ribbonwood/houhi. Mountain

beech/tawhairauriki is also here; it can grow on mountain sides up to 1260 m!

*If you go off track, watch out for live ammunition.* This land was once used for army training, and there may still be live ammunition lying around. If you see any suspicious items, do not handle them. If possible, note the location and inform the police as soon as possible.

**Stour Bridge car park to Lake Emily** 15 km, 5 hr (track 13)

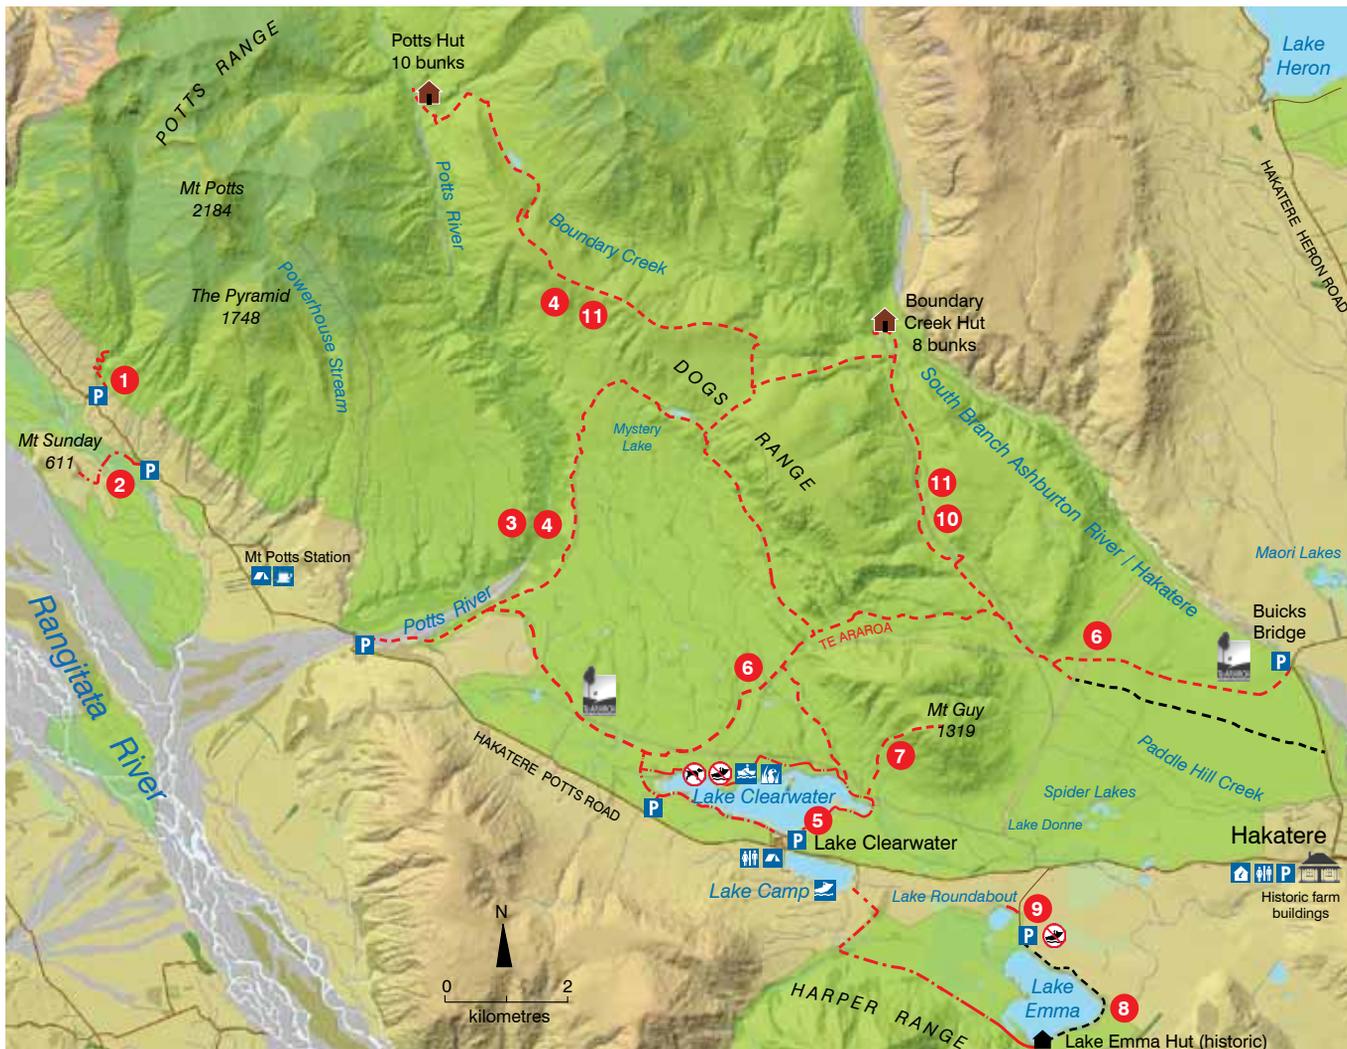

### Mount Barrosa

This easily obtainable peak gives good views out across the Conservation Park and even to Aoraki/Mount Cook.

A small car park on Ashburton Gorge Road, about 500 m east of Blowing Point Bridge, gives access to public conservation land after a walk of 780 m.

**Mount Barrosa summit track** 3.5 km, 2 hr 30 min (track 12)

## Hakatere Potts Road

This area offers a variety of lakes (for boating, ice skating and fishing), walks from 5 minutes to all day, a 'Lord of the Rings' site, two old musterers' huts, mountain biking, hunting and an area popular for horse trekking. See the Hakatere Heron Road section for alternative access into the Clearwater area from Buicks Bridge.

## Lake Emma (Kirihonuhonu)

Walk or mountain bike to the historic Lake Emma Hut (overnight stays are not allowed) and then on to Lake Camp (Ōtautari). The two-room hut at Lake Emma, with its tack shed and verandah, was built between the late 1860s and 1890. It sits by the lake shore and is a lovely spot for a breather or lunch.

During the summer, there is weather-dependent 4WD access to Lake Emma Hut; this makes it easier for picnicking, fishing or those who are less mobile.

A boat launching site at the northern end of the lake makes exploring the lake by kayak very easy.

**Lake Emma car park to Lake Camp** 9 km, 3 hr  
(track 8)

## Lake Roundabout

This little gem has lovely views of the surrounding mountains and, at the southern end, heads of *Carex secta*/pūkiō look like trolls standing in the lake.

**Access track to Lake Roundabout** 60 m, 5 min  
(track 9)

## Lake Clearwater (Te Puna a Taka)

Once at Clearwater village, head down to Lake Clearwater (Te Puna a Taka)—either drive through the campground to its west side or start from the car park at the picnic tables above the lake.

There are lots of possibilities here; this lake is well known for its fishing, wind surfing and ice skating. A track (open during the summer to 4WD vehicles) runs from the village to the lake outlet and then continues along the northern side. Walk or mountain bike around the lake shore, climb Mount Guy for fantastic views or have a quiet lunch at the lake outlet.

You'll find information about Australasian crested grebe/kāmana (a waterbird that never comes onto the land) and a special plant, the *Carex secta*/pūkiō, at the campground and lake inlet.

**Lake Clearwater circuit track** 10.3 km, 3 hr  
(track 5)

**Lake Clearwater to Mount Guy summit**  
4.3 km, 2 hr 30 min (track 7)

## Potts River, Mystery Lake and beyond

For longer walks or an overnight camp, head to Mystery Lake—the area around here is fascinating, with steep roche moutonnées (rocky 'knobs' smoothed by passing glaciers), jumbled scree and (surprising for such a treeless area) large Hall's tōtara.

Further inland is an old musterers' hut, Potts Hut, which was built prior to 1899 and extended between 1947 and 1957. This hut offers basic accommodation with 10 bunks.

**Potts River car park to Mystery Lake** 9.2 km, 4 hr  
(track 3)

**Potts River car park to Potts Hut** 23 km, 9 hr  
(track 4)

**Te Araroa: Potts River car park to  
Buicks Bridge car park** 21 km, 7 hr (track 6)

## Mount Sunday and Mount Potts

Mount Sunday is a stunning site, with expansive views of the Rangitata River and the surrounding mountains. Carved by glaciers, this hill got its name because boundary riders from the high-country stations would meet here on Sundays. More recently it was the film site for Edoras in the movie *The Lord of the Rings: The Two Towers*. Interpretation panels explain the importance of our remaining 'stars'—our native fish and quinnat salmon.

In contrast to Mount Sunday, get your tramping boots on and head up the Mount Potts easement track to climb Mount Potts—after the easement, there is no marked route to this high peak (2184 m).

**Mount Sunday easement track** 1.5 km, 30 min  
(track 2)

**Mount Potts easement track** 1.5 km, 30 min  
(track 1)

Swin River looking towards Taylor Range

## Hakater Heron Road

This area offers lakes of different character and size, kettle holes, old musterers' huts and an alpine adventure hut, a mountain peak climbed by Sir Edmund Hillary and two glaciers.

### Buicks Bridge

Buicks Bridge car park is a popular starting point for horse trekkers, and those walking Te Araroa and or heading to Boundary Creek Hut.

Boundary Creek Hut (built between 1902 and 1906) offers basic accommodation and has 8 bunks. The hut once marked the boundary between the winter and summer grazing blocks on the old Hakater Station. A concrete floor was built in the mid 1950s as the hut was renowned for its rats! An alternative access to this area follows a 4WD track for 4.6 km to Paddle Hill Creek. The entrance to the track is on the western side of Hakater Heron Road, about 1.8 km from Hakater corner.

*Buicks Bridge car park to Boundary Creek Hut*  
13.9 km, 5 hr (track 10)

*Buicks Bridge car park to Potts Hut* 29.7 km, 11 hr  
(track 11)

*Te Araroa: Buicks Bridge car park to Potts River car park*  
21 km, 7 hr (track 6)

See map on page 15 for the above tracks.

Maori Lakes (O Tū Wharekai)

## Maori Lakes (O Tū Wharekai)

These attractive lakes, right by the road, are a good spot to have a picnic, go fishing or watch waterbirds.

## Lake Emily

Lake Emily gives good access to Manuka Hut (basic, 6 bunks), making it a potential family day walk or overnighiter. A small stream near the hut is fun to play in and New Zealand falcon/kārearea nest in the area.

To get to Lake Emily, turn right just before crossing Jacobs Stream Bridge at Castleridge Station. 2WD vehicles can be parked on the verge of the farm track—please be considerate of other users and farm vehicles. 4WD vehicles can travel a further 1.4 km to a car park on the public conservation land.

Do not take mountain bikes or horses on the Te Araroa route from Lake Emily to Manuka Hut as it is steep and easily damaged. For mountain bike or horse access to Manuka Hut, continue down the Stour River past the Te Araroa junction for a further 2.5 km before turning left.

**Lake Emily to Manuka Hut** 4.5 km, 1 hr 30 min  
(track 14)

**Te Araroa: Lake Emily to Rakaia valley**  
43 km, 14 hr 30 min (track 18)

Lake Emily also gives access on old farm tracks to Stour Bridge car park. From the lake, the route is mostly down hill, making it an easy walk and an even easier mountain bike ride!

**Lake Emily to Stour Bridge car park** 15 km, 5 hr  
(track 13)

Lake Heron (Ō Tū Roto)

## Lake Heron (Ō Tū Roto)

This is the largest lake in the area. It was named by Thomas Potts, the first run holder of Hakatere Station and one of New Zealand's earliest conservationists. Potts named the lake after the white heron/kōtuku, which were found around the shores.

Unfortunately, only an occasional white heron/kōtuku now visits the area, but the lake is still home to Australasian crested grebes/kāmāna, marsh crane/koitareke and Australasian bittern/matuku.

Lake Heron (Ō Tū Roto) is popular for picnics, walks (both long and short) as well as fishing for trout and quinnat salmon (also known as chinook, king or spring salmon).

## Kettle hole walk

A short easy walk to a kettle hole is marked from the access road to Lake Heron car park. These part-time wetlands were formed when huge blocks of ice broke off the retreating glacier, leaving depressions that

sometimes fill with water. The flowering plants that live in kettle holes are mostly very small, rare and have special ways of using the changing water levels to their advantage. The interpretation panel gives more information.

## Harrisons Bight and Lake Hill

Lake Heron car park is 1.7 km along the shore from Hakatere Heron Road. From here, there is summer 4WD access to Harrisons Bight. For access details contact DOC's Geraldine office.

From the car park, there is an easy walk up Lake Hill. The Hill is a great place to appreciate the lake and surrounding mountains and the effects of past glaciers. An interpretation panel explains how water shaped the landscape and is shaping it still.

**Lake Heron car park to Lake Hill** 1.5 km, 45 min  
(track 15)

Double Hut

## Double Hut

An old musterers' hut, Double Hut (basic, 6 bunks), makes a good base for exploring the area, climbing Mount Taylor or for hunting.

The size of a musterers' hut reflects the number of musterers needed to get the sheep off the hill. In the early 1990s, a mustering gang comprised four men,

each with about six dogs, and a 'packie' who cooked for the gang.

Sir Edmund Hillary visited the hut and climbed Mount Taylor. Though it is only about one-quarter of the height of Mount Everest, the view from the top over Lake Heron (Ō Tū Roto) and to Aoraki/Mount Cook is breathtaking.

**Lake Heron car park to Double Hut** 10 km, 3 hr  
(track 16)

## Te Araroa

Te Araroa crosses Clent Hills Saddle, connecting the Rakaia and Rangitata rivers. This long-distance pathway passes close to Double Hut.

## Cameron valley

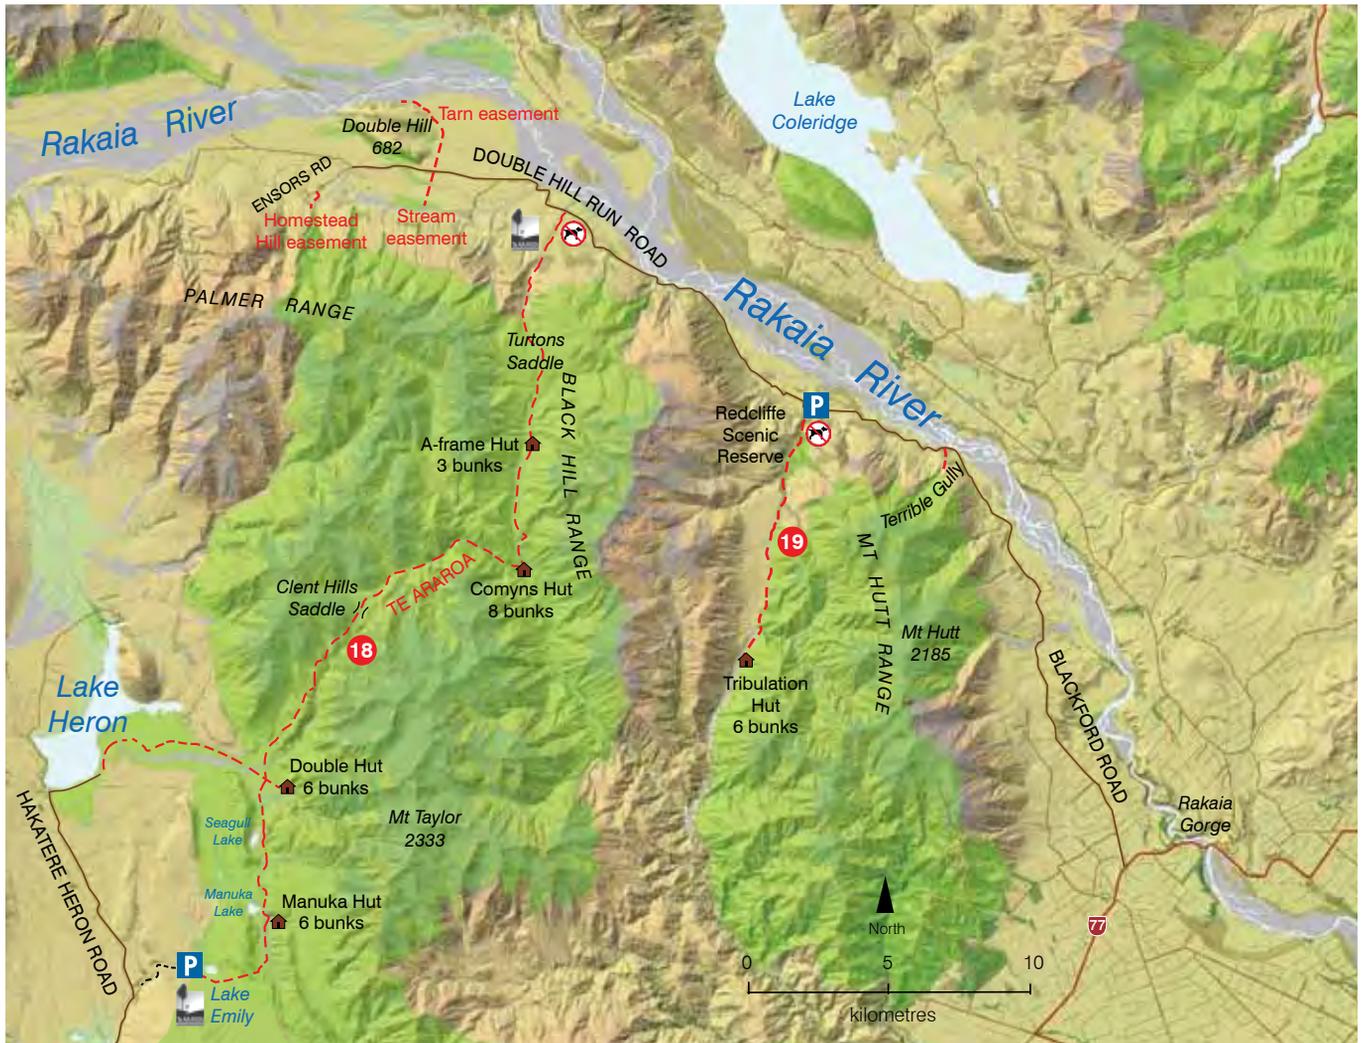

To reach Cameron valley, drive past Mt Arrowsmith Station towards the head of Lake Heron (Ō Tū Roto) for about 1.6 km. Just past a gravel pit follow an unmarked 4WD track for about 1.4 km to the start of a route up the true right of the Cameron valley. Cameron Hut (basic, 9 bunks), which is owned by the Canterbury Mountaineering Club, sits amongst piles of moraine from the Cameron Glacier. The hut has stunning views of the Arrowsmith Range, and tahr have been seen from the hut bunks.

*Please be aware that Cameron Hut is subject to a low level of avalanche risk.*

**Cameron Hut route (unmarked)** 15.6 km, 6 hr  
(track 17)

Near Lake Heron (Ō Tū Roto) Photo: G Iles

## Blackford Road/Double Hill Run Road

The approach to the eastern side of Hakaterre Conservation Park is from State Highway 77. Follow Blackford Road, which then becomes Double Hill Run Road up the southern side of the Rakaia. This side of the park is less visited, but has a dramatic quality all of its own with wide tussock valleys and scree-covered peaks.

There is no public access from the end of the road to Lake Heron (Ō Tū Roto).

## Terrible Gully

A public easement from Double Hill Run Road to Terrible Gully gives entry onto public conservation land on Mount Hutt Range.

## Redcliffe Scenic Reserve

A tramping track is marked from a small car park on Double Hill Run Road up the true right of Redcliffe Stream to Tribulation Hut, which has 6 bunks. In September, the kōwhai flowers make a splash of yellow in the scenic reserve by Redcliffe Stream.

## Rakaia valley to Tribulation Hut

10 km, 3 hr 30 min (track 19)

## Te Araroa (Glenariffe easement)

Turtons Saddle, with great panoramic views back over one of New Zealand's iconic braided rivers, is the gateway to the Rakaia River/Rangitata River section of Te Araroa. A wide tussock valley leads to A-Frame Hut (basic, 4 bunks), which was built by the Water Catchment Board in 1970, when they trialled an experimental plot of pine trees.

A further 2-hour walk takes you on to Comyns Hut (basic, 8 bunks), which was built in 1957. The framing, timber and corrugated iron were flown in by aeroplane; the window glass and frame arriving later by packhorse. Te Araroa continues over Clent Hills Saddle and drops down past Double Hut (basic, 6 bunks), Manuka Hut (basic, 6 bunks) and Lake Emily before continuing past Lake Clearwater (Te Puna a Taka) to the Rangitata River.

**Rakaia valley to A-Frame Hut** 9.5 km, 3 hr

**A-Frame Hut to Comyns Hut** 6.5 km, 2 hr

**Comyns Hut to Double Hut** 17 km, 7 hr

**Te Araroa: Rakaia valley to Lake Emily**  
43 km, 14 hr 30 min (track 18)

## Stream easement

A 1-kilometre easement to the public conservation land at Glenariffe Stream is marked from Double Hill Run Road. Be prepared to get wet feet crossing Double Hill Stream.

## Tarn easement at Double Hill

Opposite 'Stream easement', a marked 4WD track goes around the base of Double Hill to the Rakaia River. From this track, tarn easement gives access onto Double Hill and views out across the Rakaia River.

## Homestead Hill easement

Ensors Road branches off Double Hill Run Road opposite Double Hill. A small car park on Ensors Road marks the start of a steep easement onto the Palmer Range.

## A taste of the high country

A car-based, one-day tour, sight seeing and exploring in Hakatere Conservation Park

### Tour 1

Start at Hakatere corner—not only is this the gateway to the area, but there are some good map and interpretative panels to help make your visit more enjoyable!

From here, drive to Maori Lakes (Ō Tū Wharekai), on the Hakatere Heron Road. You can park near the shore, relax and enjoy the sound of the wind in the bulrushes/raupō and the calls of the waterbirds over a 'cuppa'. Continue to Lake Heron (Ō Tū Roto) and walk to the kettle hole—whether it's full of water or dry, this glacial depression is worth a visit.

Returning to your car, drive to Lake Heron car park and have lunch by the shore of Lake Heron (Ō Tū Roto). Then walk up Lake Hill (1.5 km 45 min) and enjoy the panoramic views before making a leisurely return to your car.

There are public toilets at Hakatere corner, Lake Heron car park and Mt Arrowsmith Station campground.

Lake Heron (Ō Tū Roto)

## Tour 2

Start at Hakatere corner—call in, wander round the old buildings and imagine what life would be like, living with a young family in the old Stone Cottage with a winter gale roaring outside. Then follow Hakatere Potts Road to Lake Clearwater (Te Puna a Taka).

In summer, make a 4WD trip out to the lake outlet and stretch your legs, play on the bridge and enjoy the views. Or head through the campground to the lake shore; whilst relaxing, see if you can spot the endangered Australasian crested grebe/kāmana.

After leaving Lake Clearwater (Te Puna a Taka), continue west along Hakatere Potts Road. Just before the road dips steeply down to the Potts River, there is a brilliant viewpoint that offers wide vistas out over the Rangitata River to the backbone of South Island, the Southern Alps/Kā Tiritiri o Te Moana.

Continue on to Mount Sunday; take your lunch and walk to the top (1.5 km, 30 min). This lump of extra hard rock resisted being worn away by a huge glacier that flowed over it on its way down to the Canterbury Plains.

There are public toilets at Hakatere corner and Lake Clearwater campground.

Mt Sunday

## Further information

For any additional information or to report sightings of conservation interest, contact the Department of Conservation office in North Terrace, Geraldine.

Phone 03 693 1010

Fax 03 693 1019

To report safety hazards or conservation emergencies, ring the DOC HOTline 0800 362 468.

**Emergencies phone 111**

### Other brochures

Detailed information on Mount Somers and Mount Hutt can be found in the *Mt Somers Track or Around and about Mid-Canterbury* brochures.

(See: [www.doc.govt.nz](http://www.doc.govt.nz))

**NEW ZEALAND  
environmental  
CARE CODE**

Protect plants and animals
