

Reserve boundaries

To maintain the untouched appearance of the inlet, the boundaries of the marine reserve are not marked with obtrusive markers. Please use the map and GPS points provided below to ensure you do not fish within the marine reserve. The decision to refrain from using boundary markers will be reviewed in 12 months.

Remember

Fishing in the reserve or taking or disturbing anything found naturally in the reserve is illegal.

Feeding fish disturbs their natural feeding behaviour.

Discharge of any pollutants or ballast water in the reserve, and introduction of living organisms to the reserve are illegal activities.

These are offences under the Marine Reserves Act 1971. Offenders may be prosecuted.

Further information

We hope you enjoy your visit to Ulva Island/Te Wharawhara Marine Reserve.
