Dear Clyde

**OFFICIAL INFORMATION ACT REQUEST**

I refer to your official information request received via email on 21 July 2011 requesting a list of all kiwi - fledglings, juveniles, and adult birds - known to, reported to, or documented to have been killed, predated, scavenged or poisoned, in the Tongariro Forest Park, and surrounding areas, in the last 5 years.

Please find enclosed the information which you requested.

Yours sincerely

## Tongariro Forest Kiwi Sanctuary Kiwi Chicks (to 183 days)

### July 2007 to July 2011

List includes all monitored chicks within Tongariro Forest Kiwi Sanctuary since 06/07 season. However, this obviously represents only a proportion of the total TFKS chick population. Every chick listed was radio-tagged (sex listed if known). When cause of death was established (using expert opinion, evidence, and pathology/Massey University) it was listed. When cause of death was not conclusively able to be established (carcasses too decomposed, not located, lack of evidence) it was listed as cause unknown.
