MOUTHORAA – MANU KUIA

HITORI NANAŌ MANU-KUIIA

- 1300 -1840 540 Years of harvest
- 1840-1940 100 years of non harvest – change ownership
- 1940-1958 Harvesting resumes
- 1958-2010 Rahui imposed by Ngati Awa
- 2010-2018 Harvesting Resumes

- 23/07/2008 Request by Ngati Awa to TTaT to undertake traditional harvest
- 21/09/2009 Application from TTaT to undertake traditional harvest
- Nov 2010 Harvesting Resumes (200 Kuia per year)

The intent is to revive and perpetuate the traditional practices.

Moutohora has the largest breeding colony of Kuia in Aotearoa, Estimated at 90,000 breeding pairs in the 2005 survey by land care.

Muttonbirders on Whale Island in 1940.
