

Meeting Memo – Te Rūnanga o Ngāi Tahu – Stewardship Land Reclassification

То	Minister of Conservation	Date submitted	10 June 2025
Reference	25-M-0073	DocCM	DOC-10344006
Security Level	In Confidence		

Meeting date/time	12/6/2025, 4pm
Meeting location	Te Rūnanga o Ngāi Tahu office, Show Place, Christchurch
	Attachment A - Categorisation of national park decisions. Attachment B - Categorisation of decisions where Ngāi Tahu disagree with DOC recommendations.
Attachments	Attachment D - Talking Points - Stewardship Land Reclassification. 9(2)(f)(iv)

Key contacts			
Name	Organisation	Role	Cell phone
Peter Galvin	DOC	Director Treaty Negotiations and Land	9(2)(a)
Sefeti Erasito	DOC	Treaty Relationship Advice Manager	9(2)(a)

Purpose of Meeting

- 1. To discuss your intended decisions on the reclassification of stewardship land in the Western South Island, Te Tai Poutini, with the Kaiwhakahaere of Te Rūnanga of Ngāi Tahu (Ngāi Tahu).
- 2. There are several live topics which the Kaiwhakahaere may wish to discuss. We can provide further updates on additional topics as required.

Stewardship Land Reclassification

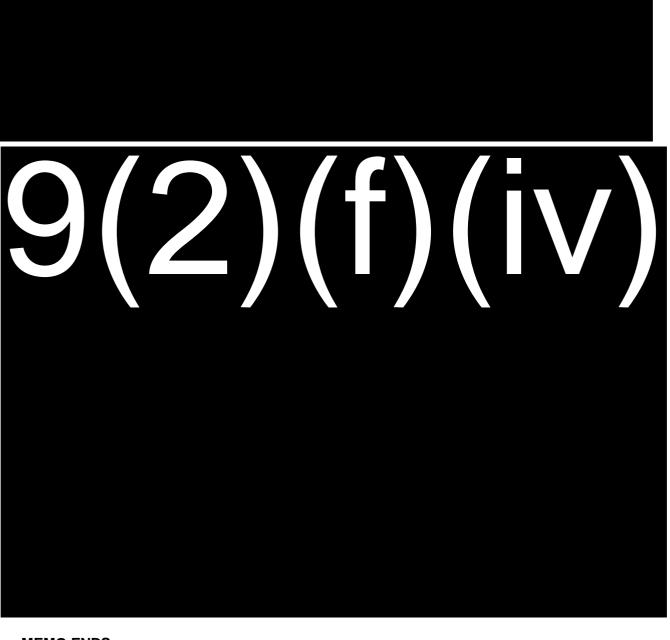

- 3. The reclassification of stewardship land in the Western South Island, Te Tai Poutini, is in its final stages [25-B-0146 refers]. Your role is to decide whether to approve, or decline, each of the 576 reclassification proposals that were notified.
- 4. A National Panel and Ngāi Tahu Mana Whenua Panel made reclassification recommendations for ~644,000ha of stewardship land in the region, roughly 24% of all

- NZ stewardship land. The National Panel recommendations were adopted and notified as your proposals.
- 5. We have produced a summary of submission report, which includes DOC recommendations whether to proceed or not with each proposal. Of the 576 proposals, we have recommended to proceed with 480 proposals (525,996ha), not proceed with 93 proposals (118,018ha) and proceed in part with three proposals (3.6ha).
- 6. Ngāi Tahu agree with 466 DOC recommendations (81%) and oppose 108 (19%).
- 7. If you were to only approve proposals where DOC has recommended to proceed, and Ngāi Tahu agree, 375 proposals (65%) covering 426,911ha (66%) would be implemented. The remaining ~217,100ha (34%) would remain held in stewardship, in addition to the ~175,000ha already withheld from public notification due to its significance to Ngāi Tahu.
- 8. We have provided you with advice regarding the scope of relevant considerations for your decisions [25-B-0224 refers], and the prioritisation of decisions for national park proposals and areas where Ngāi Tahu oppose DOC recommendations [25-B-0233 refers]. This advice has informed engagement between your office and the Ngāi Tahu Technical Team in advance of this meeting with the Kaiwhakahaere.

We have engaged with Ngāi Tahu to understand its position on the notified proposals

- 9. Ngāi Tahu final input on the reclassification proposals was included as Attachment D to Briefing 25-B-0146. Areas where Ngāi Tahu disagree with the DOC recommendations are summarised below. We have undertaken further categorisation of these proposals, initially through memo 25-B-0233 and subsequently following further discussions with the Ngāi Tahu Technical Team.
- 10. <u>National Parks (Attachment A)</u> Areas were proposed to be referred to the New Zealand Conservation Authority (NZCA) to investigate the suitability of national park additions. Ngāi Tahu holds a tribal position opposing any additions to national parks within the Ngāi Tahu takiwā. Concerns regarding the limitations of national park classification were also shared by Ngāti Apa ki te Rā Tō and Ngāti Rārua. This relates to 49 proposals (77,101ha).
 - DOC has recommended to proceed with 48 of these proposals. We consider that
 these areas hold natural/historic resources that warrant consideration by the NZCA.
 This process allows for the NZCA to further explore specific Ngāi Tahu interests
 and aspirations, including investigating the likely socio-economic implications of the
 proposals to determine what giving effect to Treaty principles may require.
 - Further categorisation has identified seven sites where the Crown may be
 particularly motivated to pursue national park status (Attachment A). This includes
 iconic sites which are of heightened public interest (associated with Cave Creek
 and Pike River disasters), and five areas which have previously been
 recommended for addition in a National Park Management Plan.
- 11. <u>Ngāi Tahu specific interests (Attachment B)</u> Reclassification proposals (conservation parks and scenic/historic reserves) were notified for areas that contain pounamu resources, or are adjacent to Ngāi Tahu forestry. Ngāi Tahu has advocated to retain these areas in stewardship to enable further assessment of the values and opportunities of the whenua for Ngāi Tahu. This relates to 20 proposals.
 - DOC has recommended to proceed with these proposals. We consider that the
 notified proposals appropriately reflect the natural/historic resources present. They
 allow for particular activities related to the identified Treaty interests to be
 considered, for example through the granting of concessions and/or the collection of
 cultural materials, and other activities that do not require specific permissions.

- In memo 25-B-0233, we advised that given the specific nature of the interests identified, there may be a higher risk of Ngāi Tahu challenge if you follow our recommendations in these instances.
- 12. Other Matters (Attachment B) Reclassification proposals where Ngāi Tahu has stated general opposition, or raised matters which are not tethered to a specific Treaty interest. The matters raised include Fast-track applications, local infrastructure, climate mitigation planning or future opportunities for DOC and the West Coast community. Ngāi Tahu has advocated for these areas to be held in stewardship until the identified matter is resolved. This relates to 40 proposals.
 - DOC has recommended to proceed with these proposals. None of the classification proposals for these areas fall under Schedule 4 of the Crown Minerals Act, where for example, most fast-track applications would be ineligible. Consideration of the matters raised by Ngāi Tahu would not be precluded by the notified proposals.
 - In memo 25-B-0233 we advised placing a higher priority on adhering to DOC advice regarding these proposals due to a perceived lower risk of Ngāi Tahu challenge to decisions. Further categorisation has divided these proposals into additional bundles:
 - i. Four instances where DOC has recommended you do not proceed with the notified proposal (two conservation park and two disposal proposals). Ngāi Tahu consider that the notified proposal is appropriate, and that you should proceed as notified.
 - ii. Six areas proposed to be classified as Government Purpose reserve, where DOC is actively using the buildings to support its conservation work and where it is difficult to purchase new sites. Ngāi Tahu consider that the notified proposals are inappropriate, and that the areas should be retained in stewardship to support future opportunities for the Crown.
 - iii. Fifteen areas, proposed for a mixture of conservation park, local purpose reserve and scenic reserve. Ngāi Tahu consider that the notified proposals are inappropriate, and that the areas should be retained in stewardship to support future opportunities for the West Coast region, with specific opportunities detailed.
 - iv. Fifteen areas, proposed for a mixture of conservation park and scenic reserve. Ngāi Tahu consider that the notified proposals are inappropriate, and do not reflect the values present.
- 13. We consider that our recommendations to proceed with these proposals have given proper consideration to the section 4 directive, while also being consistent with the overarching conservation purpose of the Act. As Minister, it may be that after considering all relevant matters, you decide to give greater weight to certain matters than DOC, including the views of iwi. This will inform your view on the adequacy or suitability of notified proposals.
- 14. We suggest you use these categorisations (Attachments A & B) as the basis for discussing your decisions with Ngāi Tahu, particularly where there is not alignment between the notified proposal, DOC's advice and the feedback from iwi. Your talking points reflect this categorisation and are framed as your "intended" decision given you will need to make a final decision following engagement with your Ministerial colleagues.

MEMO ENDS

Attachment A: Categorisation of national park decisions DOC has recommended proceed

Attachment D: Talking Points – Stewardship Land Reclassification

General talking points - Western South Island reclassification is well advanced

- As you are aware, I've been working my way through the 576 reclassification proposals using the DOC summary of submissions report that was reviewed by Ngāi Tahu kaimahi.
- I am keen to make decisions mid-2025, after informing my Cabinet colleagues.
- This hui follows through on my commitment under our 2024 stewardship land Agreement, that "the Kaiwhakahaere and mana whenua will be given a reasonable opportunity to meet with the Minister to provide separate views and/or recommendations before any final decisions are made".
- Ngāi Tahu and DOC have demonstrated a strong working relationship through this
 process, and it is worth highlighting how effectively the technical teams have worked
 together.
- The strength of the relationship is evident, with Ngāi Tahu agreeing with 81% of the DOC recommendations as presented in the summary of submissions report.
- Substantive outcomes for Ngāi Tahu can be seen in the DOC recommendations:
 - 10 DOC recommendations to retain land in stewardship due to the identified Treaty interests. This includes two DOC recommendations to overturn the notified proposal (at Lake Māhinapua and a Karamea historic pā site).
 - Three individual Ngāi Tahu historic reserves.
 - The 181,000ha Tarahanga e Toru Historic Reserve, made up of fourteen stewardship areas.
 - The ~175,000ha withheld from public notification due to its significance to Ngāi Tahu.
- There are however some areas of non-alignment between the notified proposals, DOC's advice and your feedback:
 - o 48 areas proposed to be considered for National Park classification.
 - 60 sites where there are different views on the suitability or appropriateness of the particular classification proposed.
- I think a useful way to work through these sites is to group them into categories. The work our officials did together over the last week has helped to frame these categories.

Decisions where there are differences - National Parks

- Ngāi Tahu share concerns with the two other iwi that provided feedback, Ngāti Apa and Ngāti Rārua, on the limitations of the National Park classification.
- Although DOC has recommended I proceed with 48 national park proposals, officials have categorised seven sites where the Crown may be particularly motivated to pursue national park status.
- This includes iconic sites associated with Cave Creek and Pike River disasters which are of heightened public interest, and five areas which have been recommended for addition in a National Park Management Plan.
 - o For these sites, my intended decision is to...

Decisions on where there are differences - 60 non-aligned sites

- There is a group of 20 sites where the Ngai Tahu recommendation is based on specific long-term interests, that the land contains pounamu resources or is adjacent to Ngāi Tahu forestry.
 - For these sites my intended decision is to...
- Of the remaining 40 sites where there is not alignment between the notified proposal, DOC advice and iwi feedback, the differences revolve primarily around the suitability of the proposed classification. These have been broken down into four further categories:
- i. Four instances where DOC recommended that I do not proceed with the notified conservation park or disposal proposals. Ngāi Tahu have advocated that the notified proposal is appropriate.
 - o For these sites my intended decision is to...
- ii. Six areas proposed to be classified as Government Purpose reserve. Ngāi Tahu have advocated that the areas should be retained in stewardship to support future opportunities for the Crown.
 - o For these sites my intended decision is to...
- iii. Fifteen areas where Ngāi Tahu have advocated that the areas should be retained in stewardship to support future opportunities for the West Coast region. These were proposed for a mixture of conservation park, local purpose reserve and scenic reserve.
 - o For these sites my intended decision is to...
- iv. Fifteen areas where Ngāi Tahu have advocated that the notified proposals are inappropriate, and do not reflect the values present. These were proposed for a mixture of conservation park and scenic reserve.
 - o For these sites my intended decision is to...

Next steps

- I would welcome your thoughts on my draft decisions.
- Following our discussion, I intend to inform those Cabinet colleagues who have an interest in stewardship land of my intended decisions. I will then look to finalise my decisions.
- I intend to publish a press release to announce my decisions publicly, and proactively release material associated with my decisions, including the DOC summary of submissions report and advice.
- There is an opportunity for Ngāi Tahu to support any announcements I make, and my
 office will engage with you to discuss this opportunity as the details develop.
