1 Lands administered by the Department

1.1 Background

1.1.1 Introduction

The Department of Conservation administers large areas of land in the Bay of Plenty. Most of this land is administered under the Conservation Act 1987 and Reserves Act 1977 (*see Table 1 and Table 2*). Many reserves under the Reserves Act 1977 are vested in local authorities, fish and game councils, and other organisations.

The Bay of Plenty Conservancy has been mapped at two scales, 1:500,000 and 1:125,000. The 1:500,000 maps show ecological districts, management areas, and 1:125,000 map sheet coverage. The 1:125,000 maps show all lands administered by the Department.

The Conservancy administers lands under four different Acts with more than 15 types of status. Ecological areas, forest sanctuaries and wildlife refuges overlay other forms of land ownership e.g. Moutohora (Whale) Island is a Wildlife Management Reserve under the Reserves Act 1977 and has a Wildlife Refuge Status under the Wildlife Act 1953.

1.1.2 Classes of land status

There are two classes of land (*see Table 1, Table 2 and Table 3*) in which the Conservancy has an interest:

- a) Land vested in the Crown and administered by the Department (excluding reserves where other agencies appointed to control and manage);
- b) Other lands of the Crown not directly administered by the Department in which the Department has an interest. These include:
 - i) Privately owned lands in which the Department has an interest; and
 - ii) Significant reserves vested in the Crown but administered by special boards or under appointment to control and manage (*see Table 3*).

1.1.3 Numbering of parcels of land administered by the Department

Every parcel of land also has a discrete number which starts with the map sheet number e.g. T13039 where the "T13" is the sheet number. The "039" is number of the parcel of land on that sheet. Where a parcel of land extends across several sheets the northern-most sheet number is the number used on the other sheets to denote that land area e.g. where the Kaimai-Mamaku Forest Park (T13039) extends onto sheet T14 the park is identified as pt. T13039.

Where there are areas with a different status within the Kaimai-Mamaku Forest Park such as an ecological area or a sanctuary, these are numbered according to the map sheet they are on or if over more than one sheet the northern number is carried on.

1.2 Index system

1.2.1 How to use this volume

To find an **area of land administered by the Department** first identify where it is on the Sheet Coverage map (*see Map 3 Sheet Coverage*), then look at the appropriate map sheet.

To find **the name, area, ecological area, or local authority of an area of land administered by the Department** first identify where it is on the Sheet Coverage map (*see Map 3 Sheet Coverage*), then turn to the appropriate 1:125,000 sheet map and note the number for that parcel of land. Go to index 3.1 (Index by number) and find the number, name, status, area, local authority (*see Table 4*) and ecological district (*see Table 5*).

There are four indices:

- 2.1 Index by number,
- 2.2 Index by name,
- 2.3 Index by number for each ecological district,
- 2.4 Index by land status (this follows the same format as Table 1 Land Inventory).

A parcel of land which extends over two or more ecological districts (e.g. Whirinaki Forest Park) has been placed into the ecological district which has the greatest area of that parcel of land.

NB: There is one exception to this. The Kaimai-Mamaku Forest Park extends over several ecological districts. For the purposes of this strategy the Kaimai-Mamaku Forest Park has been divided at the ecological region boundary just south of Thompsons Track into T13039a (northern) and T13039b (southern) blocks.
