

Land Deed

You have inherited the deed to one square kilometre of land. Your mission is to create your very own forest here to encourage native wildlife e.g. birds, reptiles, fish and insects to this area. Think about things like: what a forest needs; the trees you will plant; what landforms will be there etc.

Ingredients:

1. How do the terms ecosystem and biodiversity relate to your forest?
2. Think of some ways to ensure your forest stays this way.
3. Are there any areas near your school/house like this? Why/why not?
4. What could you and your school/community do to help keep more forest areas from being damaged and destroyed?
