Linda Chronis.

Since 1866 there has been a lighthouse on the island to assist ships in navigating the harbour. The first lighthouse was replaced in 1900. The light can be seen 29 kms out to sea (the distance from Matiu/Somes to the city is 8kms). A tramway was used to transport supplies up to the lighthouse. The rails run into the sea. A trolley was pulled up, turned at right angles on a turntable in a shed, then winched up to the lighthouse. The light has operated automatically since 1924. The lighthouse-keeper's house was removed by making a raft of the walls and roof and sailing it to Karaka Bay.

? **Why do we need lighthouses?**

*For navigation, to warn of rocks, etc.*

? **What other lighthouses can you see, or do you know of, around Wellington?**

? **Why do you think this site was chosen?**

👉 **Find the tramway that was used to transport supplies up to the lighthouse.**

? **What other technology could be used?**

The lighthouse was once surrounded by farmland. 20 years ago this area was planted.

? **What effect do you think this has had on the island's wildlife?**

? **What can you see here now?**
