

Quarantine checklist for day visitors to Te Hauturu-o-Toi / Little Barrier Island

Items being taken must have been:

- Scrubbed clean of all soil, seeds and vegetation and treated with Sterigene
- Clothing hot washed in sterigene and dried in a dryer or inside
- Checked for the presence of rodents and invertebrates

You can buy the antiviral product Sterigene from your local vet who can give you more instructions on how to use it. Or from an online supplier. Sterigene should be used at a dilution of 1:20 for soaking or a 1:50 dilution for cleaning dirty surfaces. Sterigene can also be used in the washing machine instead of washing powder – use 50ml undiluted for a 4.5 kg load of washing

Item	Required actions	Done	Inspected by DOC
	Scrub boots and footwear in sterigene, check no seeds or soil are present. Let them dry then check them again. A pinhead of soil can spread Kauri dieback .	<input type="checkbox"/>	<input type="checkbox"/>
	Make sure the tread is thoroughly clean. Scrub dry and check again as they will look clean when wet.	<input type="checkbox"/>	<input type="checkbox"/>
	Inspect the laces, inside folds or flaps in footwear for soil and seeds. Lift out inner soles to check and clean.	<input type="checkbox"/>	<input type="checkbox"/>
	Hot wash in sterigene and check all clothing, especially polar fleece and wool to make sure all seeds have been removed.	<input type="checkbox"/>	<input type="checkbox"/>
	Thoroughly clean and wash in sterigene leggings, raincoat and other outer garments. NO GAITORS	<input type="checkbox"/>	<input type="checkbox"/>
	Check all Velcro and seams to remove all soil and seeds. Use a comb to remove seeds from Velcro.	<input type="checkbox"/>	<input type="checkbox"/>
	Clean out all pockets and check for seeds. Turn pockets out for washing.	<input type="checkbox"/>	<input type="checkbox"/>
	Inspect socks, hats and other high risk items for seeds. Socks often have many seeds. Buying a new pair of socks may be easier than picking the seeds out of your old ones. Wash in sterigene	<input type="checkbox"/>	<input type="checkbox"/>
	Inspect and clean every container prior to packing. Ensure containers are pest-proof.	<input type="checkbox"/>	<input type="checkbox"/>
	Wash fruit and vegetables to ensure there is no soil. (Buy prewashed fruit and vegetables) No cucumbers allowed due to risk of transmitting Cucumber Mosaic Virus to Mawhai (native cucumber). Check your filled roll!	<input type="checkbox"/>	<input type="checkbox"/>
Field equipment, camera case and other items	Carefully check camera case, first aid kit, glasses case, and all other items. Pay particular attention to pockets and Velcro as they trap seeds. Clean with sterigene	<input type="checkbox"/>	<input type="checkbox"/>
