WHAT TO DO!!

If there are any signs of an eruption (earthquakes, rumbling from crater, ash cloud or flying rocks):

› Move out of valleys by removing your skis or board and climbing the valley sides to a ridge top.
› Move as quickly as possible down the mountain from at-risk lifts (Jumbo and High Noon) and all trails at their elevation.
› Know where the safe areas are (buildings, lift lines and ridges below Jumbo T-Bar and High Noon Express).
› Stay in safe areas until advised otherwise by ski area staff.

HAZARDS

Summit Hazards

› Ruapehu is an active volcano
› During an eruption there may be ash, gas and flying rocks on the upper mountain, especially within the Summit Hazard Zone
› This zone includes Jumbo T-Bar and High Noon Express

Lahars

› Eruptions generate lahars (volcanic mudflows) which move down valleys in a flash flood.
› During an eruption stay out of valleys and follow instructions from staff.

Disclaimer

Volcanic activity and other unforeseen factors may alter features on this map, so safe and hazardous areas may change without notice.
