

Plates

**Figures 1, and 9–12 are coloured photographs.
They are presented here as Plates.**

Figure 1. *Sigaus childi* adult female, one leg has probably been lost in an encounter with a skink. The sinuate caudal edge of the pronotum casts a distinct shadow on the abdomen. *Photo: Colleen Jamieson*

Figure 9. (*Right*) Development of pasture on Little Valley station.
Photo: John Douglas

Figure 10. (*Below*) Earnsclough Tailing Historic Reserve.
Photo: Colleen Jamieson

Figure 11. Proposed reserve site, Galloway Station. The north-facing hillside is covered in rocks, *R. australis* and introduced weeds, the south-facing slope is predominantly tussock oversown with sweet vernal. Matagouri and *Olearia* grow at the bottom of the south-facing slope beside the Manor Burn.
Photo: Colleen Jamieson

Figure 12. Close-up of Galloway north-facing slope where *S. childi* is found.
Photo: Colleen Jamieson
