**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Collective responsibility for our Hauraki Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of our Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of ALL users of the marine environment.

It's apparent that granting 'customary take' rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise our Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions to which New Zealand is a signatory. The Waitangi Treaty expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights - irrespective of ethnic origin.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take' - by anyone - irrespective of ethnic origin.

I support the proposal for new 'Seafloor Protection' Areas.

Thank you for considering my comments,

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

I also believe that the current proposal is exceptionally racist and I disagree with it wholeheartedly.

Regards,

s 9 (2)(a)

**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

Any rights to fish an area based solely on race is racist and divisive. It creates a system like South Africa had only this is the reverse! It did not end well there and will not end well here. It's either no one fish or all have the same rights to fish.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I recently read an article by a lady who, as a girl, lived by the Gulf and sailed widely with her father. She said the Gulf was 'teeming with large fish'. When she recently returned, she was shocked at how lifeless the Gulf was and how the fish were small and scarce. Something needs to be done URGENTLY to restore this beautiful water.

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of a ALL users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I recently read an article by a lady who, as a girl, lived by the Gulf and sailed widely with her father. She said the Gulf was 'teeming with large fish'. When she recently returned, she was shocked at how lifeless the Gulf was and how the fish were small and scarce. Something needs to be done URGENTLY to restore this beautiful water.

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of a ALL users of the marine environment.

**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

As a resident of Waiheke Island I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions.

Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf.

I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed but revitalising the Hauraki Gulf is a collective responsibility.

The revised proposal fails to meet the criteria of 'collective' if exemptions are to be granted based purely on race..

In its current form this proposal is both counter intuitive and contradictory.

We all have an equal responsibility to protect and revitalise the Hauraki Gulf.

Respectfully

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** My feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

To the Department of Conservation,

I am writing to provide my feedback on the Revitalising the Gulf proposals.

It would be good to have more marine protected areas to enhance the health of the Hauraki Gulf.

However it is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment as it discriminates based on ancestry.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take' and equally applied to everyone.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

Maori fishing rights have already been decided with hundreds of million of dollars given to Maori along with extensive fishing quota. This despite the fact that Maori certainly did not fish out to the 200 mile boundary. I respectfully suggest that the granting of these iwi only fishing rights is not, or should not, be within the bailiwick of a Government department. There are bigger issues here which should probably be decided by Parliament or the Courts

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I am an old Kiwi. My ancestors arrived here more than 6 generations ago and fishing and use of the coastal waters is a deep part of my heritage. My mother talked of spending time on the beach camping and fishing with her grandfather in the 1930s. Every few weeks as a child we would go fishing. As a young adult I took up coastal yatching in a small craft and I estimate I would have spent more than 500 nights in anchorage along our coastline . The activity was considered essential to our wellbeing. It is deeply wrong to consider some people would derive more benefit than others from this activity based on their ethnicity. I honour the need to protect the Hauraki Gulf but we must all make the commitment together. To allow some to predate when others are restricted is simply wrong.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf, but not in this watered down format.

It is important to me that all marine protection mechanisms are inclusive and transparent and apply equally to all section of the community.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

The rules must apply equally to every citizen to achieve their objective otherwise they will be ignored. Making special exceptions for some categories people will invite disrespect for the law and the administering agencies, if not open defiance and community resentment. Personally I would feel no obligation to comply with such unfair legislation and many would feel the same.

Another big flaw is that the area around Great Barrier Is is not being considered for protection and it is needed here. Fishers from Greater Auckland, Bay of Plenty and even further afield are hammering the Great Barrier fishery as inshore fish stocks decline. This is a huge oversight.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

Please note that I welcome more marine protected areas to enhance the health of the Hauraki Gulf BUT I do not agree with separatist laws that recognise one type of New Zealander over another .

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of ALL users of the marine environment.

Granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf.

Equality under the law is an important part of our constitutional right and is Guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights!

I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

I find this race-based approach to conservation abhorrent - you are party to bringing reverse apartheid to New Zealand and it needs to stop.

If you research the damage to New Zealand's natural environment following Maori settlement then you would NEVER consider the Maori ancestors custodians of sound conservation values

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

Giving a fishing rights preference to Iwi over other New Zealanders is contrary to the Prime Minister's mantra of "One people, one nation". Implementing such a ruling will only further divide us.

It is important to me that all marine protection mechanisms are inclusive and transparent and equally apply to all New Zealanders.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

**Subject:** Feedback on Revitalising the Gulf

To the Department of Conservation,

I am a diver and sailor. We holiday in the gulf each year on our yacht, although we live in s 9(2)(a). We do not catch fish or harvest shellfish. We anchor all around the Gulf, and just enjoy the beauty. I think the Gulf is a wonderful place for all to enjoy equally.

I am concerned at the stress the gulf marine life are under from having such a large population bordering it. The pollution from land based activity alone must have a large impact. I notice a lot of fishermen on the water, which is wonderful to source food from. However I would ask that reasonable restraint in catch limits and protected areas should be in place to ensure marine life survival. As Aucklands population grows, the amount of fishing and harvesting must be increasing, putting pressure on the fishery.

I understand that iwi may obtain exclusive rights to harvest and fish in areas. Whilst I understand their belief that they have ancestral rights, I do wonder how and who will police this. How practical is that in reality. Will local iwi carry a card identifying their right? Will Maori from throughout NZ be able to fish also. How will genuine rights holders be identified? I can see huge issues with the approach to allow some folks to harvest only.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide my feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf to allow marine life to regenerate and repopulate the waters of the gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent where everyone equally participates in the regeneration of marine life.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. The proposal for new 'Seafloor Protection' Areas is welcomed.

By allowing one race to be advantaged over any other is **UNDEMOCRATIC, Racist, and Totally Unacceptable!** I believe such practice can only bring about greater division within NZ, something that all true Kiwi's, who love their homeland, have worked hard to eliminate.

Kind regards, s 9 (2)(a)

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I am concerned about the proposed HPA around Motutapu Island. This is a key fishery for small boat fisherman providing protection from south westerly winds. While there is still areas around Rangitoto, this area is significantly more rocky leading to more lost fishing gear and therefore pollution in the ocean.

In addition by removing an important fishing area for small boat fisherman, this has the unintended consequence of discriminating against those without the financial resources to purchase larger boats to (safely) travel further afield. Fishing is an important way for us to feed our extended family especially during times of high living costs.

Furthermore It is important to me that any marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am shocked at what is currently being considered under this legislation and hence, I am now writing to provide feedback on the "Revitalising the Gulf" proposals.

While I welcome some increased, but limited, marine protected areas to enhance the health of the Hauraki Gulf, granting an advantage to one group of New Zealanders over another, and basing this on an accident of birth & colour, is entirely against the spirit of equality which up to now, this country has embraced.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights exclusively to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. The Treaty of Waitangi expressly states that every New Zealander has 'ngā tikanga katoa rite tahi' - equal rights.

The proposal for new 'Seafloor Protection' Areas is welcomed.

To the Department of Conservation,

Are you taking the piss??

We are all kiwis, therefore we all should have the same right!

Marine parks don't work! Have a look at one of the oldest reserves at mayor island! It's full of Kina barrens as the commercial aren't allow to keep on top of the Kina problem. But bang smack next to the reserve were (I a commercial harvester) has been it's a underwater forest with all the kelp re growth. This is more proving that marine parks are not the answer but managing fish stocks is!!

Happy to back this up with more evidence if wanted!!

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

So me and my pakeha mates can fish in our boat on one side of the line and my brown mates can fish in their boat on the other side of the line a few meters away. Thats a good idea !  
Can you tell me how it would work if one of my brown brothers took me out on their boat ? The lone honky....Would they have to anchor off one side of the boat so the boat turned sideways so as to keep me out of their "patch" ?  
How exactly would that work?  
One step forward, two big DoC steps back for harmony.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Our collective responsibility over the Hauraki Gulf

To the Department of Conservation,  
I have a question as part of feedback on the "Revitalising the Gulf" proposals.  
Through their mother, my 3 sons have 1/64th Maori ancestry to s 9 (2)(a)

s 9 (2)(a)

s 9 (2)(a)

If my 2 daughters & I take one or more of my sons or grandchildren out fishing on my boat, will we ALL be allowed catch fish in the Hauraki Gulf?  
Or only the one with a possible Auckland area ancestor from the mid-1800s?  
What procedure can we use to prove ancestry to Auckland in particular, please?  
And do ex-slave ancestors taken to the Hauraki Gulf area count? Their DNA will not necessarily match any "official Hauraki genome", -- --- if such a thing exists.

Is splitting families up by racial-origin on fishing trips the intention of these proposals?  
Un-necessary cams of worms will be opened up, and not the bait kind of worms.  
Will iwi be allowed to charge for DNA-testing as 'proof' before granting a racist fishing ticket?

I believe that granting customary take rights only to [ SOME? ] iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf.  
Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf.  
I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

My experience has been that many maori disregard catch limits and size limits. I have owned a coastal property on the Coromandel and allowed local senior maori to cross my land to launch and retrieve their boats. They repeatedly took huge numbers of juvenile, undersized fish, tried to hide their catch under covers and each year totally stripped inshore rocky areas of all life. As a result, we need to ensure that the same rules and regulations apply to all New Zealanders and are strictly enforced. If I told you the names of the individuals involved, you would recognise them and be shocked at the senior positions they have held.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

I am providing feedback on the Revitalising the Gulf proposals.

I am pleased with the idea of increasing the number and size of marine protected areas in the Hauraki Gulf.

Since I believe that all marine protection decisions need to be inclusive and transparent, I have concerns about a proposal that divides users and gives one group, iwi, the right to fish while taking it from others. This is divisive.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

This new proposal is also racist and divisive.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

This is my feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf to ensure the long-term health of the environment.

Furthermore, this should be inclusive of all people and that there should be a high-level of transparency.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that limited no-take marine reserves under the Marine Reserves Act are a good way to restore the Gulf. I suggest the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas should be limited and if they have to, then as 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Our collective responsibility over the Hauraki Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Our collective responsibility over the Hauraki Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** My feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

I BELIEVE IN DEMOCRACY. ALL PEOPLE EQUAL.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

It is important for the continued health of the fisheries in the Hauraki Gulf that there be more marine protected areas.

It is concerning that the the proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment. All marine protection areas should provide for rules that are inclusive and easily understood.

I believe creating a class of reserves that grant customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' that are proposed should be given a marine reserve designation.

Regards,

**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I dispute that more marine protected areas will enhance the health of the Hauraki Gulf.

It is important to me that all marine protection infringements are taken seriously and prosecuted through the courts, regardless ethnic or religious background. If the penalties were sufficient to deter transgression, the Hauraki Gulf has the diversity to self revitalise.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the Treaty of Waitangi and we as NZ'ers should be collectively responsible to do whatever, to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that temporary no-take rules are the best way to restore the Gulf. I recommend that strict enforcement be implemented with a higher level of marine prosecutions of offenders. Make it less attractive to offenders by empowering the courts to seize 'ALL' assets. Self imposed discipline is the way forward.

**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

Additional marine no take areas are not required. Instead of spending money creating new laws and legislation for office job people to make more money, how about being practical and putting money into enforcement and education. A lot of people have no boat knowledge or fishing rules knowledge. There is no ongoing education or enforcement.

Create a licence to fish which requires education. If the rules are broken the licence is taken away!

The proposal for new 'Seafloor Protection' Areas is welcomed. However it lacks clarity in exact seafloor protection. It says no dredging or mining but is silent in scuba diving. Scuba diving should not be included as it doesn't not affect the sea floor.

Regards,

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

To the Department of Conservation,

I do not support Maori having more rights to the gulf than anyone else, Everyone in nz has equal rights and this has been the principle of nz democracy for a very long time.

Nz should not be going down the road of discriminatory race base policy, we don't have to look far too see how successful race based policy is or the damage it can do, refer to south Africa, it doesn't nothing to unite society instead breeds and developes secreting and resentment, it's down right racist, it advantages a minority whilst disadvantaging a majority, regards of how you try to frame it it is racist notwithstanding your best intent.

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I support more marine protected areas to enhance the health of the Hauraki Gulf. I also support the proposal for new 'Seafloor Protection' Areas.

I do not support the proposed new 'High Protection' areas as these do not provide adequate recognition of the rights and responsibilities of all users of the Hauraki Gulf.

The proposal to grant customary take rights to iwi only is unacceptable and will be unworkable. It is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Everyone in New Zealand should have equal rights and equal responsibilities.

The best way to restore the Hauraki Gulf would be to establish No-Take Marine Reserves under the Marine Reserves Act.

I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a Marine Reserve designation. These areas should be strictly 'No Take'.

**Subject:** Our collective responsibility over the Hauraki Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas which are essential to enhance the health of the Hauraki Gulf, a stretch of water that is precious to all Aucklanders and will become even more precious as Auckland continues to grow.

It is important to me that all marine protection mechanisms are inclusive and transparent. Compliance depends on a sense of the need for restrictions on fishing and a sense that these restrictions are fair to all citizens.

The proposal for new 'High Protection' areas does not properly recognise the rights and responsibilities of ALL users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of New Zealand's constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

'No Take' is clear to all. It means what it says. It will best create conditions for the Gulf to renew itself. 'High protection' is equivocal and encourages the perception that the rules don't apply to everyone. The 'why not me?' mentality will corrode the effectiveness of the proposed protections.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

To the Department of Conservation

it appears that once again our woke government is pandering to a minority group that should have no more rights than the rest of us New Zealand citizens.

the United Nations has confirmed equality before the law as a fundamental human right. Therefore, all citizens must be provided with the same rights and responsibilities under our laws. The proposed new bill does not uphold equal rights.

If fishing restrictions are to be proposed it should be for everyone, It appears the color my skin will determine whether or not i can fish in our waters.

This is completely and utterly racist.

Regards

**Subject:** Our collective responsibility over the Hauraki Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf. However I do not support protected areas where the taking of fish or other marine life is permitted. The experience with Mimiwhangata shows that these simply don't work. The species abundance at Mimiwhangata has been shown to be less than areas with no protection at all. Moreover enforcement is not practicable where some fishing or taking is permitted. At Mimiwhangata fishing for supposedly protected reef species and usually undersize crayfish is rife.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

Further I believe this proposal if implemented will be divisive and generate ill feeling.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

PS. I watch over summer the coastlines along Browns Bay to Torbay being pillaged by groups of Maori and Polynesians. They have no care, when challenged for the environment just a belief that its their right to take what they want. You cannot allow customary rights. Each NZ citizen must have equal rights. You will deepen the already growing anger over Maori claims to everything. Ban all taking of seafood along the whole East Coast Bays coastline. Allow designated fishing areas or extend some marine reserve areas. You've already reduced catch numbers for recreational fishers now ban commercial fishing within the Hauraki gulf. They can go deeper with bigger boats but people in kayaks fishing and small speedboats can't. It is resource to be had, enjoyed and managed for all New Zealand's recreational fishers, not just some races, nor should it be removed entirely. People will just break the law then.

And no fishing periods during the snapper spawning season, ditto John Dory and Gunnard should be put in place. in the case of snapper all of October should be a no fishing period. It is senseless catching threatened fish species and are full of eggs and smelt. Hello extinction!!

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

To the Department of Conservation,

If areas need to be protected to save the sea life around Auckland I'm all for it.

But giving special rights on a race based system is apartheid.

My family has called NZ home for over 6 generations and have the same rights as everyone who is a NZ citizen.

Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf providing commercial fishing bans are in place firstly and stocks monitored. There is little point in a complete reserve if just outside it's limits dredging and seining is still allowed to decimate numbers.

It is important to me that all marine protection mechanisms are inclusive and transparent where they exist.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

4 of my friends and I attended the "Public meeting - Revitalising the Hauraki Gulf" led by Simon Watts, MP, National, North Shore at the Wakatere Boating Club, Tuesday 24 May.

It confirmed to us that National Party is colluding with other thieves to lie about the science of our oceans as a justification for introducing control over the Hauraki Gulf.

The science panel presented flawed science and there were multiple conflicts of interest amongst the panel.

The conclusions reached were illogical and ignore other solid measures being taken to improve the species health and the sea floor and water health.

The latest control measures must be stopped immediately. I am against politicisation of science. The University of Auckland scientist - Dr Andrew Jeff - looked uneasy at the conclusions being drawn. Why ? Is he able to speak about research not approved? Or researchers who've lost their jobs because their science doesn't fit the current politics?

How is it that you sent for submissions on 20th October and yet many Aucklanders who love the Hauraki Gulf were on the Coastal Classic yacht race for 4 days out of the 8 day period for submissions.

Your "problem" science is flawed.

Your "solution" is a legal overreach limiting New Zealanders peaceful and pleasant enjoyment of their Auckland harbour.

The Hauraki Gulf Users group will soon realise it needs all harbour lovers to rise against government overreach.

Maori and non-maori ordinary New Zealanders will beat a couple of woke naive new "fisheries officers" from Ngati Manuhiri as those poor fellows understand they're being used.

Up and down the country - on land and sea - New Zealanders are waking up.

Good luck - New Zealand Government (DoC) - on your attempts to control Kiwis.

You're heading into a headwind of your own making and you're going to lose.

Hi there

I am providing feedback on the Revitalising the Hauraki Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf.

I strongly believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf.

I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take' for everyone.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Our collective responsibility over the Hauraki Gulf

To the Department of Conservation,

I am emailing in the hope that the Department will recognise an independent non racially biased approach to the Revitalising the Gulf proposals.

Respectfully I would suggest that the intent of revitalisation has become overshadowed by the Department's real intention to allow some do "fish" but to exclude allotters.

It appears that granting rights of exclusivity to Iwi has overridden the importance of revitalisation of the Gulf. It can only be concluded that the Department is not really sincere in wanting to protect the Gulf; or that the Gulf in fact does not need revitalisation at all. Evidence suggests that the latter is not the case.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Revitalising the Gulf - my feedback

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

You would think in this day and age we would be treating people as one. Not having rules for one race and others for another. Having these customary rights is literally racist. Not only that it makes policing of the rules much more difficult than a blanket no-take zone.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

**Subject:** My concerns regarding the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

**Subject:** Feedback on the Revitalising the Gulf proposals

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** My feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Regards,

**Subject:** Feedback on Revitalising the Gulf

To the Department of Conservation,

I am writing to provide feedback on the Revitalising the Gulf proposals.

I welcome more marine protected areas to enhance the health of the Hauraki Gulf.

It is important to me that all marine protection mechanisms are inclusive and transparent.

The proposal for new 'High Protection' areas does not provide appropriate recognition of the rights and responsibilities of all users of the marine environment.

I believe that granting customary take rights only to iwi is contrary to the collective responsibility we all have to protect and revitalise the Hauraki Gulf. Equality under the law is an important part of our constitutional arrangements and is guaranteed under UN Human Rights provisions. Te Tiriti o Waitangi expressly states that everyone in New Zealand has 'ngā tikanga katoa rite tahi' - equal rights.

I believe that no-take marine reserves under the Marine Reserves Act are the best way to restore the Gulf. I recommend the 'High Protection Areas' be replaced with a higher level of marine protection such as a marine reserve designation. These areas are strictly 'no take'.

The proposal for new 'Seafloor Protection' Areas is welcomed.

Further, the proposal to implement 'High Protection Zones', implies that these new sites will have an even higher level of protection and access restraint, involving further prohibition than existing 'no take' protection zones. To designate these new zones as available for exclusive access by local iwi only, is blatantly endorsing partiality, selectivity and effectively, outright Racism. To present the new proposed protection areas as available only in the form of, 'exclusive customary take rights to local iwi', entirely at their discretion alone, is in every sense unjust, unfair and trashes the concept and practice of Democratic operation in our land. The proposal by the Government and D.O.C., also denies the principles of the Treaty of Waitangi; such measures as these zone restraint proposals, are most definitely NOT treating all New Zealand citizens with equality and impartiality. No group or race within New Zealand, has any inherent rights of privilege over fellow citizens, irrespective of Race, Creed or Culture.

It has been and is, a trend and direction of this current Labour political regime, to impose by various and deviant endeavours, a distinct fabric of division and segregation within the average citizens of this wonderful nation. Whatever the mandate, it is grossly misguided and in fact, clearly serves only to destabilise. It is in fact stunning, that groups of intelligent, professional and Taxpayer funded individuals, can and will seek to advance measures of imbalance such as these, on a Nation of loyal and trusting citizens, Maori and European, all inclusive. It would serve all such persons in positions of Civil responsibility, to give mind to the collective integrity and duties that are required and accompany, such roles of servanthood. Thank you.
